Next-Generation Dental Polymerization, Redefined

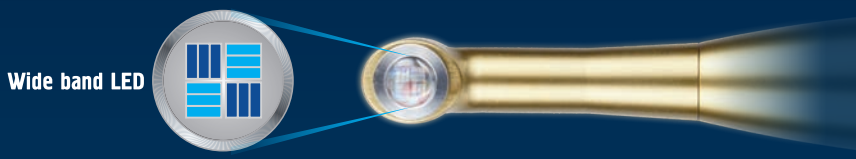

BLUEDENT XPRESS+

- **Advanced Broadband LED Technology** – Covers all light-activated materials within the 410-490 nm wavelength range for exceptional curing efficiency.

- **Dual Curing Modes for Maximum Versatility:**
  - **HYPER Mode** – High-intensity 3,500 mW/cm² power with 3 / 6 sec timer enhanced with integrated safety pause for patient protection.
  - **Optional ORTHO Version*** – Features **HYPER ORTHO mode** with 3,500 mW/cm² power, delivering 12 cycles x 3 sec each, and integrated safety pause for patient protection.
  - **RAMP Mode** – Operates at 1,500 mW/cm² with 10 / 20 sec timer, featuring soft start for optimal polymerization in general dentistry.

**Choose between the standard version with HYPER & RAMP modes (ref.#200-009+) or the ORTHO version with HYPER ORTHO & RAMP mode (ref.#200-009ort+).*

- **Precision Optics** – High-efficiency glass lens optimizes energy output for superior polymerization even in deep cavities up to 6mm.

- **Comprehensive Coverage** – Large 10mm lens diameter ensures full tooth coverage in a single cure.

- **Enhanced Patient Comfort** – Low-profile head design allows better access to molars.

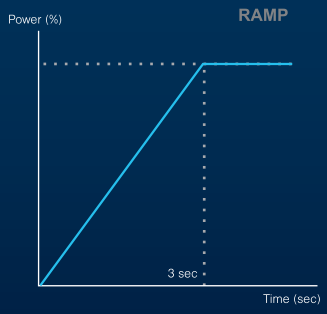

- **Effortless Operation** – Single multifunction button ensures intuitive and seamless workflow.

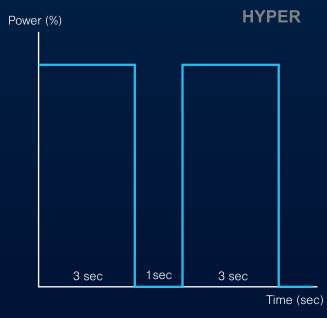

- **Smart Visual Feedback** – Illuminated, color-coded indicator ring displays the selected mode at a glance.

- **Sleek & Ergonomic Design** – Crafted from 2017 aluminum alloy, the slim, lightweight, perfectly balanced handpiece ensures fatigue-free handling and ultimate precision.

- **Premium Non-Slip Grip** – Upgraded Ilaflon™ matte coating, ensuring a secure hold and easy maintenance.

- **Unmatched Battery Performance** – High-capacity rechargeable battery delivers up to 4,000 seconds of use per charge, for full-week performance.
